^a The number of subjects who were included in each group was determined by the number of subjects who completed the study. The number of subjects who did not complete the study was determined by the number of subjects who dropped out of the study.

It is important to note that the data presented in this paper are based on a single survey. While the survey was designed to be representative of the population, there may be some limitations to the data. For example, the survey did not include information on the frequency of use of the services, which may be an important factor in understanding the impact of the services. Additionally, the survey did not include information on the satisfaction of the users, which may be an important factor in understanding the effectiveness of the services. Finally, the survey did not include information on the cost of the services, which may be an important factor in understanding the sustainability of the services.
