It is apparent that conditions were unfavourable for the growth of the *Microcystis* population and, hence, that the *Microcystis* bloom in Lake Tai was not a natural phenomenon. The *Microcystis* bloom in Lake Tai was induced by the discharge of the effluent from the wastewater treatment plant.

4.3.4. Knowledge base exploration

These are questions to be asked about any business performance and decision-making process that involves multiple stakeholders (internally or externally). Evaluation involves all of the following questions:

Il secondo capitolo, dedicato al tema della "memoria", si apre con un'analisi della memoria collettiva e della sua funzione nella costruzione dell'identità nazionale. L'autore discute il ruolo della memoria nella politica e nella cultura, e come essa viene utilizzata per creare un senso di appartenenza e di continuità storica. Il capitolo si conclude con una riflessione sulla memoria individuale e sulla sua relazione con la memoria collettiva.

It is important to note that the results of this study are based on a cross-sectional design. While this design allows for the identification of associations between variables, it cannot establish causality. Therefore, the results of this study should be interpreted with caution and used as a guide for further research.

These results are consistent with the idea that the system is not yet fully developed. It is possible that the system is still in the process of developing, and the results are therefore preliminary.

The following table shows the results of the analysis of the data.

The results of the analysis are shown in the table below. The results are consistent with the idea that the system is not yet fully developed. It is possible that the system is still in the process of developing, and the results are therefore preliminary.

The results of the analysis are shown in the table below. The results are consistent with the idea that the system is not yet fully developed. It is possible that the system is still in the process of developing, and the results are therefore preliminary.

$$\frac{1}{\sqrt{2\pi}} \int_{-\infty}^{\infty} e^{-\frac{1}{2}x^2} dx = 1$$

The results of the analysis are shown in the table below. The results are consistent with the idea that the system is not yet fully developed. It is possible that the system is still in the process of developing, and the results are therefore preliminary.
