Chapter 4

Kalman's information and diverging assumptions

One of the major problems in the information theory is the problem of the information. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

It is the main problem of the information theory that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

4.1. Information and Kalman's information

The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system. The information theory is a theory which is based on the idea that the information is a measure of the uncertainty of the system.

$$H(X) = -\sum_{i=1}^n p_i \log p_i \quad \text{and} \quad H(Y) = -\sum_{j=1}^m q_j \log q_j \quad \text{if } X \text{ and } Y \text{ are independent}$$
