

First, there is a clear distinction between the two main parts of the book. The first part, which is the most important, is the one that deals with the theory of the firm. This part is divided into two main sections: the first section deals with the theory of the firm, and the second section deals with the theory of the market. The second part of the book, which is the second most important, is the one that deals with the theory of the market. This part is divided into two main sections: the first section deals with the theory of the market, and the second section deals with the theory of the firm.

The first part of the book, which is the most important, is the one that deals with the theory of the firm. This part is divided into two main sections: the first section deals with the theory of the firm, and the second section deals with the theory of the market. The second part of the book, which is the second most important, is the one that deals with the theory of the market. This part is divided into two main sections: the first section deals with the theory of the market, and the second section deals with the theory of the firm.

Second, there is a clear distinction between the two main parts of the book.

The first part, which is the most important, is the one that deals with the theory of the firm.

The second part, which is the second most important, is the one that deals with the theory of the market.

First, there is a clear distinction between the two main parts of the book. The first part, which is the most important, is the one that deals with the theory of the firm. The second part, which is the second most important, is the one that deals with the theory of the market.

The first part of the book, which is the most important, is the one that deals with the theory of the firm. This part is divided into two main sections: the first section deals with the theory of the firm, and the second section deals with the theory of the market.

The second part of the book, which is the second most important, is the one that deals with the theory of the market. This part is divided into two main sections: the first section deals with the theory of the market, and the second section deals with the theory of the firm. The first part of the book, which is the most important, is the one that deals with the theory of the firm. This part is divided into two main sections: the first section deals with the theory of the firm, and the second section deals with the theory of the market.

The second part of the book, which is the second most important, is the one that deals with the theory of the market.

The first part, which is the most important, is the one that deals with the theory of the firm.

Second, there is a clear distinction between the two main parts of the book.

The first part, which is the most important, is the one that deals with the theory of the firm.

The second part, which is the second most important, is the one that deals with the theory of the market.

First, there is a clear distinction between the two main parts of the book. The first part, which is the most important, is the one that deals with the theory of the firm. The second part, which is the second most important, is the one that deals with the theory of the market.

The first part, which is the most important, is the one that deals with the theory of the firm.

Consider the following fuzzy inference system. The fuzzy inference system has two inputs: x_1 and x_2 . The fuzzy inference system has two fuzzy rules: R_1 and R_2 . The fuzzy inference system has one output: y . The fuzzy inference system is defined as follows:

The fuzzy inference system is defined as follows: R_1 is a fuzzy rule with the following antecedent: x_1 is A_1 and x_2 is B_1 . The fuzzy inference system is defined as follows: R_2 is a fuzzy rule with the following antecedent: x_1 is A_2 and x_2 is B_2 .

	x_1	x_2	x_1	x_2	x_1	x_2	x_1	x_2
x_1	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_2	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_1	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_2	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_1	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_2	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_1	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8
x_2	0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.8

The fuzzy inference system is defined as follows: R_1 is a fuzzy rule with the following antecedent: x_1 is A_1 and x_2 is B_1 . The fuzzy inference system is defined as follows: R_2 is a fuzzy rule with the following antecedent: x_1 is A_2 and x_2 is B_2 .

10.1 Fuzzy inference system: a concrete example

The fuzzy inference system is defined as follows: R_1 is a fuzzy rule with the following antecedent: x_1 is A_1 and x_2 is B_1 . The fuzzy inference system is defined as follows: R_2 is a fuzzy rule with the following antecedent: x_1 is A_2 and x_2 is B_2 .

$$R_1(x_1, x_2) = \min(\mu_{A_1}(x_1), \mu_{B_1}(x_2))$$

The fuzzy inference system is defined as follows: R_1 is a fuzzy rule with the following antecedent: x_1 is A_1 and x_2 is B_1 . The fuzzy inference system is defined as follows: R_2 is a fuzzy rule with the following antecedent: x_1 is A_2 and x_2 is B_2 .
